## Paint it black! ICON D-Control ES gets a new look.

Posted by ChrisB - 2007/10/06 23:50

---

This thread discusses the Content article: Paint it black! ICON D-Control ES gets a new look.

One of our members snapped this shot at the AES show (a little blurry... hoping for better shots very soon!)

So another tidbit of info on the ES....

For existing D-Control owners, the upgrade path to the ES console depends on your configuration, but you're looking at a staggering \$21-22k for all the components and their labor, and it's a direct sale with Digidesign. The upgrade should become available in late Q4 2007.

:ohmy:

Don't shoot the messenger!
