
Backup and record at same time...

Posted by Moonbeam522 - 2008/05/08 14:16

Hello,

Sorry if this is in the wrong thread, but I had a question that someone could probably help me with.

Well, I was wondering if it were possible to have a session be saving to two drives at the same time? Like having the recording session and backup being done at the same time. If someone could help me out that would be wonderful!! :)

Thanks so much
-Jessie D.
