
4.0 LCRS decode?

Posted by superfreq - 2008/05/09 11:30

Hi Paul-

Just registered to the forum yesterday. Thanks to everyone for putting this together and thanks to you for being here.

For some reason I'm unable to decode 4.0 LCRS streams in .SoundCode. I've tried multiple session setup variations to no avail. Pro Tools either indicates an insufficient amount of tracks created or crashes altogether. Is there an update I'm possibly missing? Perhaps there is a simple and obvious setting I'm missing.

Thanks in advance for any help-
