
Output issues

Posted by cashmoney805 - 2008/05/09 15:37

Hey guys, new PT user here. I'm using PT M Powered with my Mobile Pre USB but I can't get sound to come out of my computer, only the interface itself. Any clue what to do? I attached pictures of the Output and Bus screens if that helps. Thanks so much!

Pro Tools can only use the audio interface for input/output of audio. It will not use the built-in computer audio hardware.
