
V Drums?

I'm in the market for a really good real sounding virtual drum plugin for pro tools and I wanted to know what you guys use/have used. Is strike good? How does it compare to other v drums?

If its just drums you want. Im using BFD2 and getting the actuall notes from my drummer off of some roland v-drums. But you can operate BFD2 from a standalone perspective, keyboard what ever.

IMPECABLE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
