
Spot Mode Trouble

Posted by Druzilla3 - 2008/07/16 11:42

This morning my spot mode stopped spotting and kept forcing all of the audio regions to move to the beginning of the session when I click on them. I am sure there is a simple fix but what is it?

You probably accidently turned on "Auto-Spot" (which on a mac toggles with Cmd-P). Just turn that off (Options menu) and life will return to normal.
