## Non-real time Exporting

Posted by MasoudKm - 2008/07/19 10:11

---

Hi Freinds

I have a question and it is about non-real time exporting, does Protools have it like Cubase and Nuendo,... or not? you know the "Bouncing track" does it real time,but I need non-real time.

Thanks for your attention

Best Regards

Masoud

Export Region as file.

It's in the Audio menu at the right of screen. You can change the file type, bit depth and sample rate.
