
Funk Logic Mastererizer plugin generates only hiss

Posted by playsguitars - 2008/07/20 00:39

I have the Bomb Factory plugin suite and everything else works dandy except for the Funk Logic Mastererizer plug. It just hisses as I turn the knobs up to where I'm getting sound.. I've downloaded the bundle also, trying to get it to work and am at a loss as to what the next step would be! please help, i feel like it's something i could possibly use!

Ahh yes,the masterizer. Is that the one with IBPN, UBPN, and EBPN? Because if so, that's all it does... Enjoy!
