This thread discusses the Content article: Apple 8-Core Mac Pro now Pro Tools Approved

I just got the mac pro a few weeks ago and im new to the tools. But this thing is soooooooo..... sweet. and quiet. seems to be working great with the 003 system. I added a few upgrades to the mac. Was it worth it? You Bet!

I'd love to get an 8 core mac. The amount of processing power is almost unlimited. You could probably run a million plug-ins without the computer slowing down an inch.
