
Pro Tools & Nov Remote SL - help?

Posted by MusiqueLaFantastique - 2008/08/05 09:39

Hey kids, have a new Novation Remote SL 25 which is causing serious headaches. The only thing 'auto mapping' is me sanity to the outta reaches of space.

It works with Ableton, however have Waldorf and Arturia soft synths and PT's 7.4.2 on Leopard won't damn well recognise the controller.

Help?
